Customized Solutions

At **Sentra** we focus on matching clients with business solutions that speak to their individual unique requirements.
Whether you need a simple productivity tool, or a fully fledged business management solution, the perfect customized application is now within your reach, while letting your business needs determine the cost of your solution.
Take advantage our mobility solutions to fully monitor and control any aspect of your business from your hand held device in real time and on demand.

All our customized solutions satisfy industry requirements of security, support and ease of use, while maintaining a very practical pricing regime. We also present the advantage of developing applications that run well on all platforms including mobile devices and web based platforms. Mobile devices are far cheaper to use and they provide mobile connectivity and several useful features on the go, and without the need to invest in expensive new equipment.

AppSheet

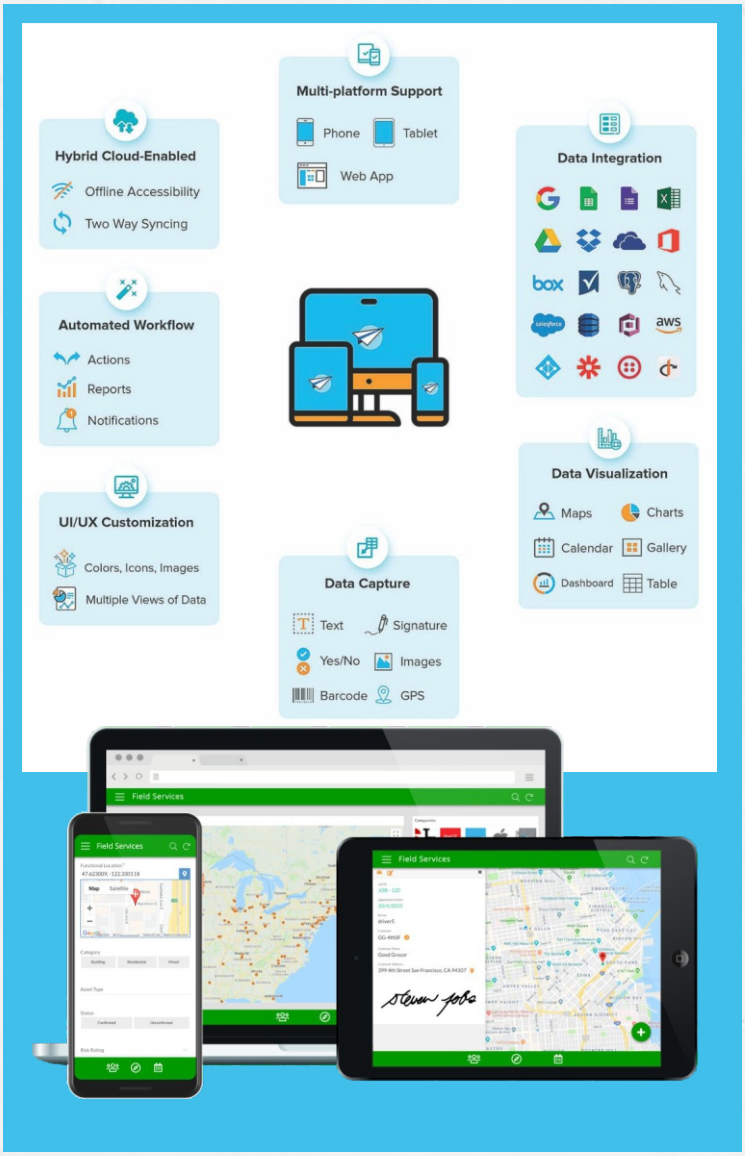
Our solutions are primarily custom built to serve your unique business environment needs. Our parent platform **AppSheet** has grown to be the leading business mobility solution environment. Developers all around the world have built more than one million applications on the platform, serving everyone from renewable energy leaders in Africa to Fortune 500 corporations.

T-Mobile · ESPN · Costco Wholesale · PepsiCo · Husqvarna

Your customized solutions can now have the capabilities found in Commercial applications giving you powerful control and ease of use.

You can now better manage in-premise or field operations with the following features

Multi-Platform Support	Security and Integrity	Data Capture
iOS Android Website	Full GDPR compliance Endpoint data encryption User authentication	Forms, Bar-codes, OCR, QR-codes, signatures, photograph, GPS

Practical benefits of Your Customized Solution


- **Can be scaled down** to just serve your current pain point: i.e. cost and complexity can be matched to your present need. You don't pay for what you do not need.
- **You direct the design process** to ensure that the result is perfectly matched to your need.
- In addition to the traditional database options, the system can post data to an easy to **use spreadsheets** that can be accessed and used without the app if need be.
- **Secure and access your data better**, by making your operations completely paper free. All forms, records etc. are generated by individual users (on the spot wherever they are) from their mobile devices and posted in real time to quickly accessible cloud storage of your choice. Remove the need to aggregate paper records in a central office.
- **Access all your operational data** with dashboards, charts, tables and detail views on demand in real time right from your hand held device regardless of your location. Receive alerts and reports when certain conditions are broken or met.
- **Implement controls** at the point of data entry to avoid errors and maintain limits etc.
- **Increase accountability** by tagging every record with its creator's name, time, etc.
- **Remove the need** for the purchase and maintenance of expensive computer equipment by leveraging the increasing power and falling costs of mobile devices. Your personnel can use their own or company supplied regular smart phones. You remain compatible with all versons of iOS, Android or Web browser.
- Your customized application has **advanced security features** found in expensive software including
  - Full GDPR compliance
  - Endpoint data encryption
  - Industry standard User authentication
- Your customized application has **features found in advanced software** including
  - Real time Geo-location of field assets and personnel
  - Advanced reporting including phone notification and email reports.
  - Data capture including regular forms, bar code scanning, NFC tag reading, Signature capture and photographs all taken from mobile device.
  - GPS functions for map locations etc.
